Main ideas/Questions	Notes				
<p style="text-align: center;"><b>Parts of a Right Triangle</b></p>	<div style="display: flex; align-items: center;">  <div style="margin-left: 20px;"> <ul style="list-style-type: none"> <li>• Sides <math>g</math> and <math>h</math> are called _____</li> <li>• Side <math>g</math> is called the _____</li> </ul> </div> </div>				
<p style="text-align: center;"><b>What is the Pythagorean Theorem?</b></p>	<p style="text-align: center;">The Pythagorean Theorem is used to find a missing side length on a _____ triangle!</p> <p style="text-align: center;">Formula: <span style="border: 1px solid black; display: inline-block; width: 150px; height: 20px; vertical-align: middle;"></span></p>				
<p style="text-align: center;"><b>Proving Right Triangles</b></p> <p style="font-size: small;">Show three side lengths, use an formula to check whether or not they represent the sides of a right triangle.</p>	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%; padding: 5px; border-right: 1px solid black;"> <p>1. 16, 25, and 29</p> </td> <td style="width: 50%; padding: 5px;"> <p>2. 21, 28, and 29</p> </td> </tr> <tr> <td style="width: 50%; padding: 5px; border-right: 1px solid black;"> <p>3. 7, 24, and 25</p> </td> <td style="width: 50%; padding: 5px;"> <p>4. 48, 43, and 58</p> </td> </tr> </table>	<p>1. 16, 25, and 29</p>	<p>2. 21, 28, and 29</p>	<p>3. 7, 24, and 25</p>	<p>4. 48, 43, and 58</p>
<p>1. 16, 25, and 29</p>	<p>2. 21, 28, and 29</p>				
<p>3. 7, 24, and 25</p>	<p>4. 48, 43, and 58</p>				
<p style="text-align: center;"><b>Finding a Missing Side</b></p> <p style="font-size: small;">Use the Pythagorean Theorem to find the missing side length. Round answers to the nearest tenth.</p>	<p>5.</p>  <p>6.</p>
