

Camp Ladybug

Determining place value through 100

The Worm has arranged for all of the backyard ladybugs to go to camp. Help him figure out how many ladybugs are in each of the four buses. Write the answer on the lines.

= 100 ladybugs
 = 10 ladybugs
 = 1 ladybug

A) = _____

B) = _____

C) = _____

D) = _____

Do the Franklin's activity on page 34 before beginning this activity, and add more counters to the existing counters. Point out to your child that numbers greater than 99 take three places, and that the place on the left is the hundreds place. Make three sets of index cards with the numbers 0-9 on each set. Use these cards to make several different three-place numbers and have your child read them to you. Ask your child to show the number with the counters.
