

Horizons

Student Worksheet Packet

Horizons
Mathematics 1

This packet contains the worksheets necessary for one student in the Horizons Mathematics 1 curriculum. It is made available for anyone not being able to or not wanting to use the reproducible masters provided in the Teacher Handbook. Worksheets used more than once will need to be photocopied for that purpose or you can have the student work the problems and write answers on another sheet of paper.

There is approximately one worksheet every five lessons. (Enclosed you will find a list of all worksheets and the lessons with which they are associated).

Worksheets provide additional or remedial work for students(s). Some become manipulatives for the student(s).
