

# Be forceful!

## Observations

A push is a force. A pull is also a force. Forces can make things move. They can also slow things down. Some forces can make things move fast. They can make some things move faster than others.

## Science activity

Samantha is playing with a ball. Color in the pictures where she is making the ball move fast.

kicking

holding

throwing

bouncing

sitting

Which activity makes the ball go the fastest? \_\_\_\_\_

## Science exploration

Drop marbles from different heights onto flattened clay or playdough. What happens to the clay?
