

### Comprehension #1

The sky was dark and it was raining heavily. Rex ran along the side of the road. He was getting wet but he did not mind because he heard a noise in the rain. While he was running along, he came across a big bone on the road. He stopped and sniffed at it. He grabbed the bone with his teeth. He held it in his mouth and continued running.

He ran up a small hill and did not stop until he reached the top. Under a big tree, he dug a deep hole with his front paws and buried the bone. He filled up the hole quickly. Rex suggested this will help and ran down the hill. He got home safely.
