

To understand multiplication as a repeated addition.

Examples:

$$4 \times 3 = (3+3+3+3) = 3 \text{ lots of } 4 \\ = (3+3+3) + 4 \text{ lots of } 3 \\ = 12$$

$$3 \times 5 = 5 \text{ lots of } 3 \text{ (} 3+3+3+3+3 \text{)} \\ = 3 \text{ lots of } 5 \text{ (} 5+5+5 \text{)} \\ = 15$$

Task: Clearly work out these multiplications like the examples above.

4 x 6	4 x 6	7 x 4
5 x 6	4 x 4	8 x 6
4 x 6	3 x 7	4 x 6
6 x 6	6 x 3	3 x 7
7 x 6	5 x 6	5 x 6
4 x 7	6 x 6	3 x 4
