

## Expressive Line

### Exercise

- Try to make as many types of lines as you can.
- Repeat each type of line several times.
- Try all types of lines: wavy, curly, jagged, dashes, fat, thin, etc. Fill your page with as many lines as you can.

← Here's my example.

## Constructive or Directional Line

Unlike the expressive, directional lines are very precise. Lines should all be the same thickness. These lines look as if they are bending and overlapping. This is not "free" (like expressive lines) but calculated, constant, and even.

### Exercise

- Start anywhere on your paper. Move in a certain direction. Stop and begin in a new direction.
- Keep lines in a group the same distance apart.
- Try to go in every direction at least once.
