

Hey Diddle Diddle Mobile

1. Paste this template on heavy construction paper. Color the pictures and cut out the pieces.
2. Make the wall hanging by cutting 8 pieces of string about 6 inches long and taping them on the back of each piece into the configuration on the right. Tape a slightly longer piece of string to the top of the one to make your hanger. If you want to make this project more advanced, you could make a mobile using a hanger, straw, a paper towel tube, etc. Just make sure to cut out two of each piece and glue them together with the string sandwiched in between.
