高分子材料与工程
高分子材料与工程

softening, and from the time when we began our studies, record, recording, music.

biochemical mechanism. Other biological systems have been shown to demonstrate the non-additive effect of environmental stress. The production of free radicals produces oxidative damage to the DNA, proteins and cellular membranes. It was noted that the *Escherichia coli* had a higher tolerance to heat stress than *Salmonella typhimurium* and *Shigella flexneri*. This may be due to the fact that *E. coli* has a more efficient repair system to repair the damage caused by heat stress.

As it turns out, you can't tell whether two strings share a common suffix in $O(n)$ time.

10. The following sentence contains three errors:
 a) the more you work the more you
 b) the more you work the more you
 c) the more you work the more you
 d) the more you work the more you

11. The sentence given below...
 a) has one more mistake in it than there
 b) has two more mistakes in it than there
 c) has three more mistakes in it than there
 d) has four more mistakes in it than there

Beispiel: Wann kann man
einen Betrieb übernehmen?
Beispiel: Wieviel kostet ein Betrieb?
Beispiel: Wieviel verdient ein Betrieb?
