

Rock Cycle Comic Strip

Imagine that you are a rock. Your task is to produce a creative comic strip or mini comic book *describing the changes you go through as you progress from one form of rock to another* (The Rock Cycle). Points will be awarded based on **accuracy** and **creativity**.

The Rock Cycle

1. **Your comic *must*** include the following words:

Sedimentary Rock	Metamorphic Rock	Igneous Rock	Weathering
Erosion	Movement	Heating	Cooling
Cementation	Compaction	Heat	Pressure
Magma	Lava		

2. You should include details about the time you spent as each type of rock, and the time it took you to form. What do you look like at each stage? How large are your crystals or grains? How did you move from stage to stage? Did you mix with other things as you were cemented together? Do you have layers or foliation? Do you have a name that changes as your form changed (for example, limestone is metamorphosed into marble)?

3. **Minimum** number of **boxes** in your comic strip or mini comic book: **8.**
