

Rock your world assessment

You will work in a small group to make a travel presentation on a famous Australian landform. Your presentation needs to convince people to travel to the landform by explaining the science behind the formation of the landform. Your task is to:

1. Choose one of the following landforms:

- Devil's Marbles (Northern Territory)
- The Great Dividing Range (New South Wales)
- Jenolan Caves (New South Wales)
- Kiama Blowhole (New South Wales)
- The Three Sisters (New South Wales)
- Uluru (Northern Territory)
- Wave Rock (Western Australia)

2. Make a travel presentation on the landform by doing the following:

- Describe the landform
- Explain why people would want to visit there
- Explain how the landform had formed, including the impact of weathering, erosion and/or deposition
- Describe the significance of the landform to the local Aboriginal people

3. Choose a tool or a combination of tools to make and present your TV show in:

- Adobe Captivate
- Adobe Premier Elements
- GoAnimate!
- Google Earth
- Microsoft PowerPoint
- Voicethread
- Windows Movie Maker

Your travel presentation needs to be 3 to 5 minutes long.
This assessment will be marked by your teacher and your classmates.
