

The Umbrella Clank Can

Print the page below. Find a metal can or a can with cardboard sides and a metal bottom. (Washed baby formula cans work perfect.) Find metal frozen juice lids or metal lids that are the same size. The can also can lids that are those cans that have been opened with a can opener that lifts the lid off like the free-
pared Chef can opener. Cut the pieces out, cut them wide. Cut contact paper so it will fit on the lower
part of the metal lid. Peel the back off the contact paper. Stick the cardboard in the middle then stick it
on the lid. Use an exacto knife to cut a hole in the paper lid so the lid can fit through. Cover the can
with contact paper. Put the can label on the can then cover the whole can with clear contact paper. This
is perfect for little ones. Sit with them having all the pieces of the floor. This is great for story read-
ing. You can make two sets of characters and use as a matching activity.
