| * Indicates full-color transparencies |  |

Note: The answers to all study units will be found at the end of this teacher's guide.

#### TO THE TEACHER:

This book represents an exciting new development in the world of education. The book contains 12 prepared full-color transparencies which are perforated for easy removal. Reproducibles are included for either testing or additional student exercises.

The proper name spellings in this book are those

which coincide with the majority of secondary textbooks extant at this time. It is recommended that the names of persons and places be written on the blackboard as they are discussed.

By way of stimulating more student interest and increasing opportunities for advanced study, these transparencies can be hung, after viewing, against a white background on a classroom bulletin board.

The illustrations in these transparencies are not drawn to scale or for special accuracy.
