Read the question C: calculate A: answer

Lesson XXXIX.

1. A boy having 24 cents, bought 2 oranges at 6 cents apiece. How many cents had he left? $24 - (2 \cdot 6) = ?$

For more information about the study, please contact Dr. John Smith at (555) 123-4567 or via email at john.smith@researchinstitute.org.

2. John sold 3 bananas at 8 cents apiece, and 2 cups of peanuts at 5 cents a cup. What did he receive for the whole?

4:

3. Henry solved 7 examples on Monday, 5 on Tuesday, and 9 on Wednesday. How many examples did he solve in the three days?

$$C: \boxed{\begin{array}{|c|c|c|c|c|c|c|c|c|c|c|}\hline & \text{I} & \text{II} & \text{III} & \text{IV} & \text{V} & \text{VI} & \text{VII} & \text{VIII} & \text{IX} & \text{X} \\ \hline \end{array}}$$

4:

4. If he solved 16 examples the next week, how many examples more did he solve the first week than the second?

C:
