

Activity sheet **The main causes of flooding**

We can split the six main causes of flooding into three categories:

1. **Climate** – weather-related causes
2. **Human** – the causes that people create
3. **Physical** – naturally features of the land

Put the following main causes of flooding in the correct part of the Venn diagram. You have identified these:

Heavy rainfall	Very quick snow melt	Sea breaking	Ground that is already full of water
Already full of water	Trees being chopped down	Lands of houses being built	

Put the following main causes of flooding in the correct part of the Venn diagram. You have identified these:
