Presentations:	<u>May 31st – June 2nd</u>	50 Points	
	<u>Total Points</u>	240	

This project will be about environmental issues that affect the plants and animals of a biome. There are 3 parts to this project. You will research a particular biome, write a research paper, create a poster, powerpoint, or diorama, then present what you have learned to the class. You will have time in class and at the computer lab for research and preparation, but you will also need to spend time outside of class to work on this project. This project is worth ½ of your 4th quarter grade. Late work WILL NOT be accepted. Have fun and be creative!

Student Name: _____ Period: _____

My Assigned Biome: _____

Biome Environmental Problems: 1: _____

2: _____

I will be doing a (circle ONE): Poster Diorama PowerPoint

My Presentation Date: _____

Parent Signature: _____ Date: _____
