

**Decomposition and Synthesis Reactions Worksheet**

Complete each of the following equations, write formulas for and balance the chemical reaction equation.

**Synthesis Reaction:** A + B → AB

- 1) Barium oxide + Carbon dioxide →
- 2) Silver + oxygen →
- 3) Aluminum oxide + water →
- 4) Hydrogen + Oxygen →
- 5) Hydrogen + Nitrogen →

**Decomposition Reaction:** AB → A + B

- 6) Potassium chlorate →
- 7) Calcium carbonate →
- 8) Mercury (II) oxide →
- 9) Aluminum hydroxide →
- 10) Copper (I) bromide →

Predict the products of the word equations and identify which type of reaction the equation demonstrates (Synthesis, Decomposition, Single Replacement, Double Replacement, Acid/Base, or Combustion Reactions) and place in the blank on the right. Write formulas for each, and balance.
