

Let's rock and roll!

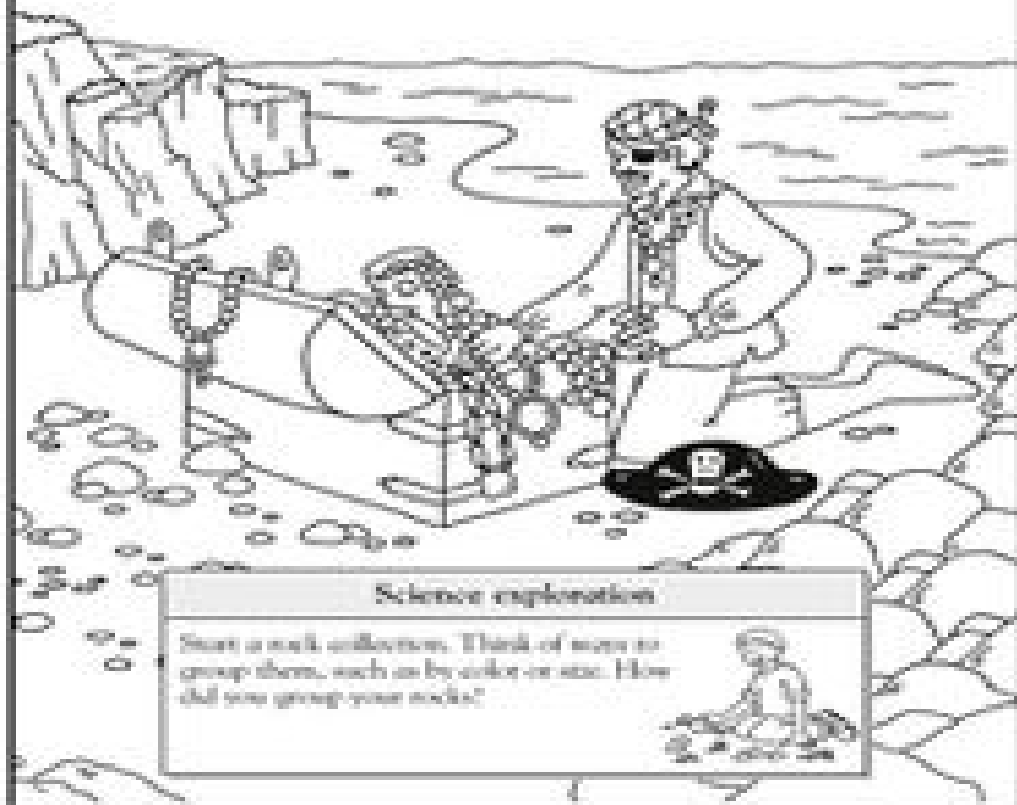

Observations

Mountains, hills, cliffs, stones, and pebbles are made of rock. Gold and gems come from rocks. Garden soil and sand are made up of many tiny bits of rock. There are many different types of rock. Some rocks are very hard, while others are soft.

Science activity

Color all the different rocks that you see in this picture.

Science exploration

Start a rock collection. Think of ways to group them, such as by color or size. How did you group your rocks?
