

We inherit traits from our parents. This means that our hair color, eye color, and even the size of our feet comes from them! When both a mom and a dad have a sickle cell gene, there is the chance that their kids could have Sickle Cell **Anemia**.

Your Mom

Your Dad

Do you have a brother or sister?

YOU!

What other traits did you inherit from your parents? Draw those too!

Which genes did **they** inherit?

Two sickle cell genes = Sickle Cell **Anemia**
