

Here are some problems written in words. They look quite long and they are all about using money.

**You should read them very carefully to see what you need to do.**

Your teacher or parent will show you how to set out your answers.

1. What is the total cost of a doll costing £3.90 and a book costing £1.00?
2. How much do four model cars cost, if each car costs 75p?
3. If a mug costs 56p, how many could I buy for £4?
4. Josephine has three 20p coins, two 50p coins and a 5p coin. How much does she have altogether?
5. John wants to buy a model steam engine that costs £5.60. His parents give him 50p a week towards it. How many weeks must he save to buy the steam engine?
6. John has a five pound note. He pays for himself and two friends to have a go on the dodgems. The dodgems costs 70p each. How much change does he get?
7. If a Braiser comic costs 23p, how many pupils in a class could buy a copy if they have £5 between them?
8. Fred has three 10p coins, six 20p coins and a 50p coin. Has he enough money to buy a toy costing £2.10 ? Explain your answer.
9. How much change would there be from a £10 note if I spend £4.76?
10. A class reading book costs £3.20. How much would 36 books cost?
