## Bill Nye: ATOMS

1. Things are made of stuff smaller than you can see with the \_\_\_\_\_.
2. A piece of matter that can't be broken a part any further is called \_\_\_\_\_.
3. Atoms are too \_\_\_\_\_ to see.
4. Protons have a \_\_\_\_\_ electrical charge.
5. The flow of electrons from one atom to another is called \_\_\_\_\_.
6. \_\_\_\_\_ that is made of atoms is mostly empty space.
7. Atoms are so small that you can put \_\_\_\_\_ on the end of a pin.
8. The main difference between aluminum and copper is the \_\_\_\_\_ in the nucleus.
9. Elements are organized into groups called \_\_\_\_\_.
10. Everything in the universe is either \_\_\_\_\_ or matter.
11. Everything that is a thing is \_\_\_\_\_.
12. Where is Carbon? \_\_\_\_\_
13. \_\_\_\_\_ is the key to life.
