

Chapter 13 Genetic Engineering **Section Review 13-1**

Reviewing Key Concepts

Completion On the lines provided, complete the following sentences using these terms: mutations, generation, organisms, selective breeding, genetic variation, traits, and genetic variability.

In the process of _____ 1. _____, animals are bred to produce desired _____ 2. _____ in the next _____ 3. _____ of _____ 4. _____, such as dogs and horses.

Breeders can increase the _____ 5. _____ in a population by inducing _____ 6. _____, which are the source of _____ 7. _____.

Reviewing Key Skills

8. **Applying Concepts** How can hybridization be used to produce plants with characteristics needed to increase food production?

9. **Comparing and Contrasting** Describe a benefit and a drawback of inbreeding.

10. **Inferring** Explain why offspring of plants exposed to radiation may have characteristics not found in the original population.
