

Question for 5-C: Name the "bones" of the hand and forearm.

1. Scapula, clavicle, humerus, radius, ulna, carpals, metacarpals, phalanges
2. Carpals, metacarpals, proximal, middle, distal phalanges
3. Metacarpals, proximal, middle, distal phalanges
4. Metacarpals, proximal, middle, distal phalanges, carpal, radius and ulna
5. Carpals

4.0.

4.1. Label the forearm:

1. Scapula, clavicle
2. The humerus, radius, ulna
3. The humerus, radius, ulna
4. Scapula, humerus, radius, ulna
5. Scapula, humerus, radius, ulna

4.2. Label the metacarpals and phalanges representing both hands.

Metacarpals:	Metacarpals are the bones of the hand, between the thumb and the little finger. They are numbered 1-5 from the thumb to the little finger. They are the bones that support the hand and hold the fingers in place.
Phalanges:	Phalanges are the bones of the fingers. Each finger has three phalanges (the thumb has two). They are numbered 1-14 from the thumb to the little finger. They are the bones that support the fingers and hold the nails in place.
Other bones:	Other bones of the hand include the scapula, clavicle, humerus, radius, and ulna. These bones are part of the skeletal system and support the hand and fingers.
Metacarpals:	Metacarpals are the bones of the hand, between the thumb and the little finger. They are numbered 1-5 from the thumb to the little finger. They are the bones that support the hand and hold the fingers in place.
