

11. Choose the best alternative to complete the text.

THE FUTURE OF THE CAR

According to the latest / new computer models that were used to estimate the running speeds of dinosaurs, the Tyrannosaurus Rex would have been able to sustain its footbeats. This study shows that the dinosaur could reach a top speed / rate of 4 metres a second, which is fractional / fractionally faster than the average conclusions previously. There has been a lot of controversy as / about whether the Tyrannosaurus Rex was a predator or a scavenger. Some believe that it might have lived near a herd, indicating that it was a scavenger, however / while others believe that it had evolved from a herd of turtles. The former / latter group will appreciate the report study, as it further shows likely / possibly to be re-evaluated.

The quality of infrastructure used to provide supercomputers includes the varying speeds of two measuring devices that used data taken present / collected from previous tests. rather / because from starting to provide data on modern models. The Tyrannosaurus Rex previously / therefore, was not the fastest dinosaur. A study showed present / current comparisons, which was about the same / size of dinosaur, could reach 10 metres a second. which / which's faster than the study. The fastest two-legged animal today, a cheetah, has reached a 28-metre a second, which would lead / lead to a faster dinosaur possibly / possibly more than half of the top fastest.

12. Decide whether the following sentences are TRUE or FALSE.

- 12. The Tyrannosaurus Rex could run 4 metres a second. ( )
- 12. The Rex was the fastest dinosaur. ( )
- 12. The fastest dinosaur could take three times faster. ( )
- 12. A cheetah is faster than a dinosaur. ( )

13. Read the sentences below and tick the corresponding preposition for each.

- 13. A kind of animal which feeds on dead animals which it has not killed itself.  
( ) A lot of disagreement or argument about something.....  
( ) A very long and uninteresting by.....  
( ) The ability to.....  
( ) A book, author or the subject of interest or general which has been presented to look for a new suggestion.....  
( ) A person or an object that makes animals feel better or worse.....  
( ) Very good or well developed.....

14. Answer the question below.

14. What is the controversy about the Tyrannosaurus Rex? Which characteristics of its actions would we use to judge that point?  
.....  
.....
