Wave Worksheet

One full wave (cycle)

Wave train – two or more waves

Amplitude – measures the energy of a transverse wave

a) measured from the equilibrium position to the top of a crest or the bottom of a trough (see vertical arrow)

Wavelength – length of a single wave cycle (horizontal arrow double sided arrow)

Frequency - # of waves that pass a point in a given amount of time

Speed = wavelength x frequency

The time from the beginning to the end of the wave train in each situation is 1 second.
