

## Real-life problems

Complete the pictures, and then write the answers.

There were 12 biscuits. James ate 3.  
How many were left?

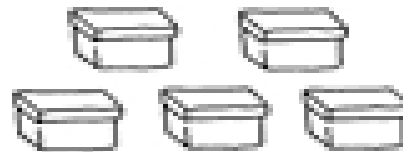

Share 12 marbles equally among  
3 people. How many marbles will  
each have?

Sadie has ten fish. She is given 11 more  
for her birthday. How many fish does she  
have altogether?

Joe had 5 boxes. He had 3 pencils in  
each box. How many pencils did he  
have altogether?

If you share 16 carrots equally among 4  
rabbits, how many carrots will each have?

Mom had 16 cups, but she broke 9 of  
them. How many cups does she have left?
