### School Rules! (Logical Thinking)

Mark, Susan, Elbert, Ron, and Gina attend Somewhere Elementary School. Although they are all friends, they each have a different favorite subject in school. Their favorite subjects, not in any particular order, are Math, Geography, English, Science, and Reading. The teachers are making schedules for the students, and this year they want to try and place each student in his/her favorite class for first period. Use the following clues to figure out which subjects are favorites for each student. (A logical reasoning table has been provided for you.)

Clues:

1. None of the students have a favorite subject that begins with the same letter as his/her first name.
2. Susan and Gina do not like English best.
3. Geography is the favorite subject of one of the boys, but Math is the favorite of one of the girls.
4. Reading is not the favorite subject for Gina or Elbert.
5. Neither Mark nor Ron care much for Science.
6. Ron's favorite subject is not Geography.
7. Susan stays as far away from the library as possible.

	Math	Science	English	Reading	Geography
Mark					
Susan					
Elbert					
Ron					
Gina
