BrainX  
Maths Training Program

Queen Ant is hiring for her Army. Some bad ants have come in to the queue. Can you find out **which are the bad ants?**

All the good ants are numbered 1 and 2. Encourage the children to think in terms of "left-right-left-right" of a parade. The numbers which are not 1 or 2 are odd one out. Make sure to tell this as a story to help build recall
