Name: _____ Date: _____

Basic Polynomial Operations

Name: _____ Date: _____

Name each polynomial by degree and number of terms.

$$x + 6y$$

$$3x^2 + 2xy^2 + 4y^2$$

$$3x^2$$

$$3x^2 + 2xy^2 + 4y^2 - 5x^2 + 7y^2$$

$$3x^2 + 2xy^2 + 4y^2 - 5x^2 + 7y^2$$

$$3x^2 + 2xy^2 + 4y^2$$

$$3x + 6y$$

$$3x + 2xy^2 + 4y^2$$

10) Critical Thinking: Why is it impossible to have a linear trinomial with one variable?

11) Simplify each expression.

$$(3x^2 + 2xy^2 + 4y^2) + (5x^2 + 7y^2)$$

$$8x^2 + 2xy^2 + 11y^2$$

$$(3x^2 + 2xy^2 + 4y^2) + (5x^2 + 7y^2) + (2x + 6y)$$

$$10x^2 + 2xy^2 + 11y^2 + 2x + 6y$$
