

Name: _____ Subject: Year 1 Science
Date : _____ Unit: 1b Growing plants

Parts of a plant (stems and leaves information sheet)

Stems help to support the plant and keep it upright.

Water and nutrients that are taken up from the roots are transported through the stem.

Leaves are very important as they make food for the plant. Leaves are made to catch the sunlight as plants need sunlight to make food. The process of plants making food is called PHOTOSYNTHESIS.
