1. Number the planets from the nearest to the furthest from the Sun.

1	_____	8	_____
2	_____	9	_____
3	_____	10	_____
4	_____	11	_____

2. **COMET** - A small icy body that follows a highly elliptical orbit around the Sun. It is composed of ice, dust, and rocky material.

3. **ASTEROID** - A rocky object that orbits the Sun. It is smaller than a planet and larger than a meteorite.

4. **MOON** - A natural satellite that orbits a planet or other celestial body. It is held in orbit by gravity.

5. **PLANETS** - A large celestial body that orbits the Sun. It is spherical and has cleared its orbit of other objects.
