

Variables both sides of equals sign	Variables both sides of equal sign $2x - 3 = 3x + 6$	Variables both sides of equal sign $5x + 2 = -2x + 23$
Variables both sides of equals sign $-5x - 12 = 4x + 24$	Variables both sides of equal sign $15 + 8x = 3x + 10$	Variables both sides of equal sign $-9 - 6x = 45 + 3x$
Variables both sides of equals sign $45 + 5x = 7x + 23$	Variables both sides of equal sign $2(x + 8) = -6x + 64$	Variables both sides of equal sign $-5(2 + x) = 3(9 - x)$
Variables both sides of equals sign $14x + 3^2 = 8^2 + 25x$	Variables both sides of equal sign $6x - 43 = 16x + 27$	Variables both sides of equal sign $17 - 13x = 31 - 6x$
