

Subtracting Mixed Numbers

Example:

$$2\frac{1}{2} - 1\frac{1}{4} = \underline{\hspace{2cm}}$$

$$2\frac{1}{2} = 2\frac{2}{4}$$

$$2\frac{2}{4} - 1\frac{1}{4} = \underline{\hspace{2cm}}$$

$$2\frac{2}{4} - 1\frac{1}{4} = \underline{\hspace{2cm}}$$

$$2\frac{2}{4} - 1\frac{1}{4} = \underline{\hspace{2cm}}$$

Now:

$$2\frac{1}{2} - 1\frac{1}{4} = \underline{\hspace{2cm}}$$

$$2\frac{1}{2} - 1\frac{1}{4} = \underline{\hspace{2cm}}$$

$$2\frac{1}{2} - 1\frac{1}{4} = \underline{\hspace{2cm}}$$

$$2\frac{1}{2} - 1\frac{1}{4} = \underline{\hspace{2cm}}$$

$$2\frac{1}{2} - 1\frac{1}{4} = \underline{\hspace{2cm}}$$
