

Value Scale

Name: _____

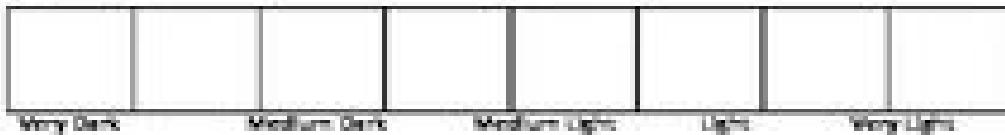

Drawing Pencil: Begin by pressing very hard. Make each box a little lighter than the one before.

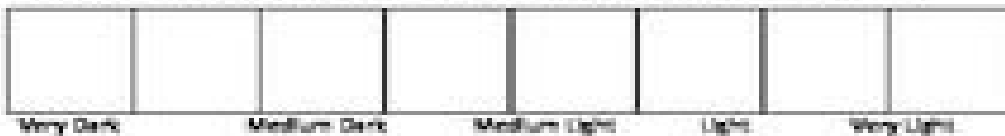

Ink Pen: Begin by filling in the entire box (just like the drawing pencil). Make each box a little lighter than the one before so that the last box is almost white.

Crosshatch: Use overlapping lines to create value. Many lines make it dark, fewer lines make it light.

Stippled: Use dots to create value. Many dots make it dark, fewer dots make it lighter.

Color: Choose one color and shade like you did with a pencil. Make each box lighter than the one before.
