

Here is a chart of the number of dragons in a box:

Red	10	Green	7
Yellow	6	Blue	8

1. How many red and yellow dragons are there altogether?
2. How many more red dragons are there than green dragons?
3. How many dragons are in the box, altogether?
4. Dan took all the green dragons and half the yellow dragons.
How many dragons did he take altogether?
5. Jo took 3 red and 4 green dragons from the box.
How many red and green dragons were left, altogether?
6. Sam took half the blue dragons.
How many blue dragons were left?
7. How many more red and green dragons are there altogether
than yellow and blue?
