

Basic Algebra (2)

Solve for x.

$$4x + 85 = 11$$

$$20x = 40$$

$$18x - 79 = -97$$

$$-12x + 59 = 47$$

$$11x - 91 = 30$$

$$20x + 41 = -79$$

$$-20x + 97 = -3$$

$$-8x + 93 = 37$$

$$-13x + 34 = -5$$

$$17x = 17$$

$$-3x + 30 = -42$$

$$-9x = 81$$

$15x = \underline{\hspace{2cm}}$ $\frac{11x + 79 = -97}{11x = -53}$ $\frac{18x - 11 = 7}{18x = 18}$

$$8x + 85 = 13$$

$$-6x + 16 = -8$$

$$8x = 16$$

$$10x - 39 = 41$$

$$-14x + 9 = -75$$

$$-17x = -17$$

$$20x = 80$$

$$-2x = -44$$

$$-17x = 34$$

$$-3x = -12$$

$$-16x = -48$$

$$-5x + 40 = 0$$
