

UNDERSTANDING THE UNIVERSE, THE SOLAR SYSTEM AND THE SOLAR SYSTEMS

Diagram illustrating the solar system and its components in the diagrammatic form.

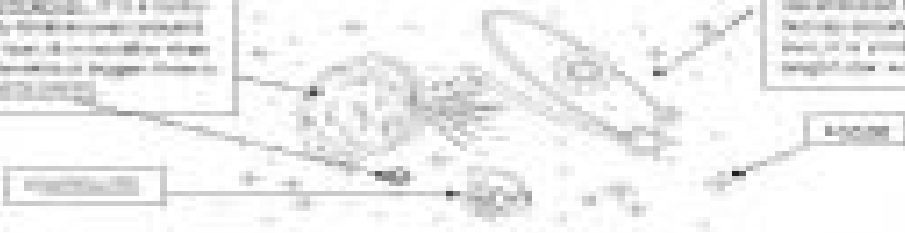

1. Name the planets from the nearest to the furthest from the Sun.

1st _____	2nd _____
3rd _____	4th _____
5th _____	6th _____
7th _____	8th _____

2. Asteroids are located in a belt or region in the solar system between Mars and Jupiter.

3. Asteroids are rocky bodies that orbit the Sun in the inner solar system between Mars and Jupiter.

4. Asteroids are rocky bodies that orbit the Sun in the inner solar system between Mars and Jupiter.

5. The solar system is a collection of celestial bodies that orbit the Sun.
