Many studies about the health implications of food are funded by companies that have a ves financial interest in the outcome of the studies. For example, Coca Cola and the Calorie Cont Council (a trade association for companies that make or sell artificial sweeteners) recently functudy on whether or not, sugary drinks increase the risk of hypertension. Do you feel that industrial should be able to fund studies on their own products? Why or why not?	trol ded a
Conduct some brief research, if necessary, to better understand the topic. Then take a posit developing the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or information and examples. Write several paragraphs which completely answer the prompt.	other
