Heat transfer worksheet 1 NAME:

Conduction, convection, or radiation? _ The heat you feel from a fireplace This type of heat transfer causes plates to move _ boiling water Heat you feel from a hot stove Frying a pancake fast particles colliding with slower particles _ air travels this way _ transfer through solids _ transfer through space moves as a wave moves as a current sun rays reaching earth occurs with fluids __ a coil on an electric stove _ this type of transfer is affected by color

The diagram below shows a covered box with thick walls that has water and air in it. Label all arrows that would be convection, conduction, and/or radiation
