

With the information below, complete the questions below.

Standard Deviation	1.5	100
Sample Size	25	1000
Mean	1	1000
Standard Error	0.3	1000
Standard Error	0.3	1000

Question: Complete the following items.

What is the first step in the process?

What is the second step in the process?

What is the third step in the process?

How much data is needed to estimate the mean?

How much data is needed to estimate the standard deviation?

How much data is needed to estimate the standard error?

How much data is needed to estimate the standard error of the mean?

How long does the process take to complete?

How long does the process take to complete?

How long does the process take to complete?

How long does the process take to complete?

With the information below, complete the questions below.

Standard Deviation	1.5	100
Sample Size	25	1000
Mean	1	1000
Standard Error	0.3	1000
Standard Error	0.3	1000

Question: Complete the following items.

What is the first step in the process?

What is the second step in the process?

What is the third step in the process?

How much data is needed to estimate the mean?

How much data is needed to estimate the standard deviation?

How much data is needed to estimate the standard error?

How much data is needed to estimate the standard error of the mean?

How long does the process take to complete?

How long does the process take to complete?

How long does the process take to complete?

How long does the process take to complete?
