

Yet another way to set
your subbies out on paper!

Yep! But this way is more like the way
your parents do it! Why don't you get an
adult to show you what is going on!

$$\begin{array}{r} 82 \\ - 35 \\ \hline \end{array} = \begin{array}{r} 80 + 2 \\ = 30 + 5 \\ \hline \end{array} = \begin{array}{r} 70 + 12 \\ = 30 + 5 \\ \hline 40 + 7 = 47 \end{array}$$

Try completing the missing numbers in these:

$$\begin{array}{l} 1. \quad \begin{array}{r} 61 \\ - 24 \\ \hline \end{array} = \begin{array}{r} 60 + \square \\ = 20 + 4 \\ \hline \end{array} = \begin{array}{r} 50 + \square \\ = 20 + 4 \\ \hline 30 + \square = \square \end{array} \end{array}$$

$$\begin{array}{l} 2. \quad \begin{array}{r} 83 \\ - 57 \\ \hline \end{array} = \begin{array}{r} 80 + \square \\ = 50 + 7 \\ \hline \end{array} = \begin{array}{r} \square + \square \\ = 50 + 7 \\ \hline \square + \square = \square \end{array} \end{array}$$

$$\begin{array}{l} 3. \quad \begin{array}{r} 74 \\ - 38 \\ \hline \end{array} = \begin{array}{r} 70 + \square \\ = 30 + 8 \\ \hline \end{array} = \begin{array}{r} 60 + \square \\ = 30 + 8 \\ \hline \square + \square = \square \end{array} \end{array}$$
