

Line

Line: An element of art that is used to define shape, volume, and surface, also to suggest movement and direction. It may be a continuous mark made on a surface with a pencil, pen or brush, or implied by the edges of objects and forms.

Characteristics of Line are:

- **Width:** _____
- **Length:** long _____, horizontal _____
- **Direction:** vertical, vertical diagonal, slanting _____, curved, parallel, wavy _____
- **Weight:** thin _____, heavy _____
- **Quality:** smooth, jagged, broken _____

Types of Line:

1. **Outline Line:** Lines that define the _____ of an object or its elements.
2. **Section Lines:** Lines that indicate the boundaries of an object's structure or a part.
3. **Implied Line:** Lines that are not actually drawn but created by a _____ of objects seen from a distance. The directions are implied by pointing to, or the direction of movement towards.

Draw the Lines:

1. Below are five boxes. Draw with the outlines of line for each box.
2. In the blank under the box come up with names for the line that draw (see it)
