

## Open Number Line: 2-Digit + 2-Digit

Name \_\_\_\_\_ Date \_\_\_\_\_

One way to add bigger numbers is to make an open number line.

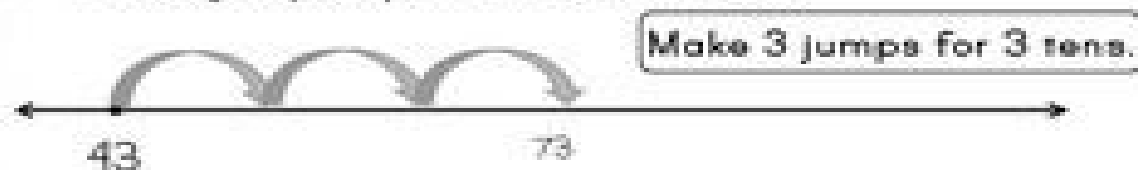

$$43 + 32 = \square$$

- Draw the number line. Start at bigger addend.

- Look at the smaller addend to see how far up the line to go. 32 is 3 tens and 2 ones.

- Make jumps up the line for tens.

- Make hops up the line for ones.

- Land on the sum.

$43 + 32 = 75$
