# SUPPLY & DEMAND

Then answer the following questions.

Cafe Bakery sells loaves of bread that it bakes fresh every day. Use the supply schedule to graph each point of the supply curve. Connect each point with a line to build a supply curve.

Price of bread per loaf	Quantity supplied
\$4.50	40
\$5.00	50
\$5.50	60
\$6.00	75
\$6.50	85

Use the demand schedule to graph each point of the demand curve. Connect each point with a line to build a demand curve.

Price of bread per loaf	Quantity demanded
\$4.50	95
\$5.00	75
\$5.50	60
\$6.00	50
\$6.50	45
