

$$8 \times 9 = 9 \times \square$$

$$30 \times 10 = \square \times 30$$

$$5 \times (3 \times 4) = (\square) \times 3 \times 4$$

$$20 \times (\square) = 5 \times 20$$

$$(20 \times 3) \times 2 = \square \times (20 \times 3)$$

$$7 \times \square = 20 \times 7$$

Find the product by writing through the numbers.

$$3 \times (5 \times 2) \times 2 = (\square) \times (\square)$$

$$(5 \times 4) \times (5 \times 3) = (\square) \times (\square) \times (\square)$$

Give the answer to 50 in the missing numbers.

$$3 \times \square = 24$$

- 20
- 30
- 40
- 50
- 60
- 70
- 80

$$3 \times (\square) \times (\square) = 24$$

- | | |
|----------------------------|----------------------------|
| <input type="checkbox"/> 2 | <input type="checkbox"/> 3 |
| <input type="checkbox"/> 4 | <input type="checkbox"/> 5 |
| <input type="checkbox"/> 6 | <input type="checkbox"/> 7 |
| <input type="checkbox"/> 8 | <input type="checkbox"/> 9 |

Now draw your own array to demonstrate.

$$2 \times 20 = 20$$

$$2 \times (4 \times 5) = 20$$
