

Name _____ Date _____

Shopping Spree

Our shoppers are ready to go. Each of them has \$99 to spend and each wants to spend as much money as possible. First, start with \$99 and keep subtracting from each of your answers as long as you can. When you don't have enough money left, write the amount left over on the blank to the right. Do the same for all three shoppers.

On your mark . . . Get set . . . Subtract!

1. Heather goes to the \$18.99 store.

$$\begin{array}{r} \$99 - \$18.99 = \underline{\hspace{2cm}} \\ \underline{\hspace{2cm}} - \$18.99 = \underline{\hspace{2cm}} \\ \underline{\hspace{2cm}} - \$18.99 = \underline{\hspace{2cm}} \\ \underline{\hspace{2cm}} - \$18.99 = \underline{\hspace{2cm}} \\ \underline{\hspace{2cm}} - \$18.99 = \underline{\hspace{2cm}} \end{array}$$
