

Worksheet:

Q1.) True or False:

1. A snake uses its body to move.
2. When living things become old they die.
3. Plants depend on humans for food.
4. Living things get energy from food.
5. Living things cannot feel and respond to the changes around them.
6. Some insects have hands to feel.
7. Most animals feel things around them with the help of sense organs.
8. Plants do not have sense organs so they cannot feel.
9. Plants breathe through stomata which are small air holes in their leaves.
10. Animals move from place to place in search of food and shelter but plants do not.

Q2.) Name any five characteristics of living things.
