

# Parts of a Plant

Name: \_\_\_\_\_

Look at the plant descriptions below and then label all the parts of the plant in the picture.

**Flower:** The flower makes seeds

**Stem:** The stem supports the plant. It also carries food, water and minerals to the rest of the plant.

**Leaves:** Leaves make food by taking in carbon dioxide and releasing oxygen into the air.

**Roots:** The roots soak up water and minerals and store food for the plant.
