

Combining Like Terms "Dart" Game

When Player 1 rolls three consecutive numbers that make up a term, he or she shoots it on the board, while the term is the sum of his or her scores, and takes another turn. The same player keeps going until he or she has three consecutive terms. In the end, the player with the highest total amount of terms wins. When both players finish their turns (or passing), each player adds all the terms in every row for a total score for him or her scores. Keep playing until all the terms are shaded in. Terms have been already listed in the game.

Player 1 Score Record: _____

_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____

Player 2 Score Record: _____

_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____
