

My routine

Hi Sam. The clock tells you what time it is in the hourglass. We get up every day, at half past five, or five o'clock. I help my mother - she has to get ready for work every day. At twelve o'clock we have lunch and my father starts at quarter to one. I start up to school. I learn at home. My mother is my teacher and we study at four every day. I finish my lesson at quarter to six and then I watch TV at six o'clock every day. At seven o'clock I do my homework. We have dinner at half past eight. I go to bed at half past nine.

TIME ON PAGE

How much time during the morning	Time	Time
my studies at home with my mother	Time	Time
my studies at my father's workplace	Time	Time
my studies with my father's workplace	Time	Time
my studies at a teacher	Time	Time
my studies at half past nine	Time	Time
